TECHNICAL SKILLS

Programming Languages: Kotlin (7+ years), JavaScript (7+ years), Swift (2+ years), SQL (7+ years)

Libraries & Frameworks: Android SDKs, Jetpack, Compose, Kotlin Multiplatform (KMP), React, Coroutines, Flow, Retrofit, OkHttp, Kodein, Coil, Dagger, Node.js, Express, Koin, Caffeine, Gson, Moshi, TypeScript, Firebase, Gradle, Mockk, JUnit, LeakCanary, LaunchDarkly, Espresso, Mokkery, Mockito, SwiftUI, Voyager, Ktor, Sqlite, Accompanist, SQLDelight, React Native, Bluetooth, BLE, Hypergate, .NET Core

Architectural Patterns: MVVM, Clean, Multi-Module, Microservices, Object-Oriented Design

Tools & Platforms: Git, Linear, Azure DevOps, GitLab, Bitbucket, Postman, Bitrise, Figma, Jira, Charles

WORK EXPERIENCE

Midwestern Interactive | *Senior Software Engineer* — Nov. 2023 – present

- Spearheaded the development of **You.com's mobile app** by implementing Kotlin Multiplatform, reducing time-to-market by **31%** and driving a **27%** increase in daily active users
- Collaborated closely with cross-functional teams (design, analytics, business) to refine user journeys, translating feature usage analytics into actionable insights, driving an **18%** uptick in premium purchases
- Refactored and optimized API endpoint code for **You.com's web app**, significantly improving code maintainability, reducing technical debt, and enhancing system performance to meet business needs
- Implemented a multiplatform testing strategy that increased test coverage from **0%** to **40%** in two months, resulting in higher-quality releases and a **38%** reduction in production crash rates
- Conducted rigorous testing of API endpoints using **Postman** and **Jest**, identifying and resolving critical performance bottlenecks to ensure seamless functional and reliability across all environments
- Streamlined CI/CD pipelines by automating production releases with **Bitrise**, while ensuring continuous release quality through integrated linters, regression tests, and regular fuzzing tests
- Collaborated with cross-functional teams, including product managers, and designers to implement innovative new features and improve the scalability of the web application for growing user demands

Land id™ | *Senior Software Engineer* — June 2023 – Nov. 2023

- Engineered the **Land id™ Android** to provide a rich mapping experience for **100,000+** users
- Built interactive mapping solutions and led rebranding efforts, increasing user satisfaction by **23%**
- Advised stakeholders on architectural improvements to reduce technical debt and proposed iterative UI refinements to reduce Mapbox rendering issues and production support incidents

care.ai | *Senior Mobile Engineer* — Jan. 2023 – Aug. 2023

- Developed Android apps for IoT devices, improving patient monitoring for **1,500+** healthcare providers
- Implemented static code analysis and linting across multiple repositories, reducing high-severity errors by **16%** and introduced obfuscation measures using ProGuard to mitigate reverse-engineering threats
- Authored in-depth onboarding and procedural documentation for new Android hires, accelerating ramp-up by **2 weeks** and fostered a consistent, quality-first development process

InRhythm | *Senior Android Engineer* — Feb. 2022 – Jan. 2023

- Developed the **Fidelity Bloom Android** app from the ground up using a multi-module architecture, enabling rapid post-launch feature deployment and achieving **100,000+** downloads after release
- Developed Home, Save, Spend, and QA Challenges features in collaboration with design and business teams, delivering an intuitive user journey and financially insightful in-app experience
- Raised code coverage by **15%** using Mockk and JUnit, significantly reducing production defects

Northrop Grumman Corporation | *Software Engineer* — May 2020 – Feb. 2022

- Delivered **6+ Enterprise Service** Android apps streamlining operations for **30,000+** employees
- Built new responsive UI enhancements for internal **SiteMinder** authentication/authorization web portals
- Created a custom OAuth2 library for Android, boosting end-user productivity and adoption
- Built async web interfaces and auditing systems for the **B-21 Raider** project, enhancing data integrity

MilTech at Montana State University | *Web Developer* Jan. 2018 – Mar. 2020

- Spearheaded development of **Virtual Industry Day (VID)** connecting government agencies with cutting-edge technology solutions, driving adoption by the Department of Defense
- Designed and developed responsive web pages, using React.js, HTML, CSS, and JavaScript ensuring seamless user experiences across devices and screen sizes
- Migrated the platform to a modern React + Node.js architecture, replacing PHP-based backend services, improving scalability and reducing page load times by **30%**
- Developed modular Node.js Microservices, including user authentication/authorization, contributing to a secure and flexible backend infrastructure

---

EDUCATION

Master of Science in Computer Science | *Georgia Institute of Technology*
Expected Graduation Date: Dec. 2026

Bachelor of Science in Computer Science | *Montana State University*

Associate of Science in General Education | *Great Falls College Montana State University*
